

PRO GROW

EVO

2.8 μmol/J

780 W 2000 μmol/s

ADJUSTABLE 3 CHANNEL LED

Now With Plant-centric Spectrum

EVO-MODEL Z

At its core is the addition of the new Samsung LM301H EVO 4000 K diode. The EVO diode shifts the previous blue peak from 450 nm to 437 nm. Plants grown under this plant-centric spectrum have bigger and thicker leaves and higher levels of nutrients.

Growth

Increased Blue

New EVO 4000 K diodes give plants a 'photon pump' resulting in up to 5% increased yields with no extra power usage. Deep blue targets peak chlorophyll & photosynthesis production for boosted vegetative growth & vigour.

Early Bloom

Increased Red & Far-red

Higher Red and Far-red output for increased production in flowering plants. The right amount of Far-red light engages Emerson Effect, encourages early node staging and more flower sites.

Late Bloom

Increased Red, Far-red + UV

UV & Red & Far-red offers maximum BPF (ePar). This encourages lateral branching, less stretching, enhanced lower size and improves essential oils, taste and aroma.

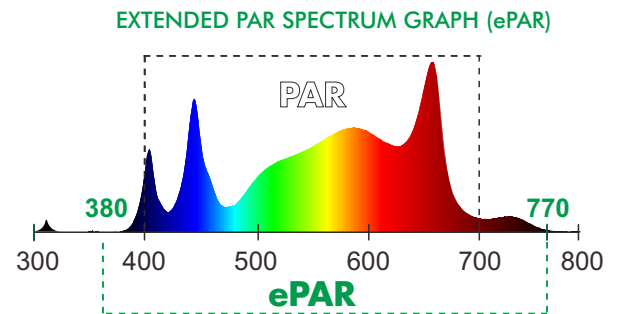

3 CHANNEL SPECTRUM TUNING

Take your crop to the next level with the PRO GROW EVO 780 W Model Z. Three separate light channels for grow, early bloom and late bloom deliver the best possible spectrum at the three most influential stages of a plants life. The addition of EVO 4000 K White, Blue, UVA, UVB and Far-red diodes result in boosted plant growth, more flower sites, increased flower density, higher crop yield & improved essential oils, taste and aroma.

- BPF (ePar) > 2000 $\mu\text{mol/s}$
- PPF - 1900 $\mu\text{mol/s}$
- Efficacy - 2.82 $\mu\text{mol/J}$
- Optimum 0-10 V Driver
- 2510 SMD LED Diodes
- CRI 91 - Full Spectrum Array
- Dimmable to 40%, 60% or 80%

SPECTRUM AND ePAR - PUSH PAST PAR

ePAR redefines the PAR spectrum to recognise the benefits of light waves outside of the 400 to 700 nm range. PRO GROW EVO 780 W Model Z includes 310 nm UVB, 395 nm UVA and 730 nm Far-red diodes. The additional diodes extend the spectral gap from 380 nm to 770 nm. This was previously only provided by a combination of HPS, MH & CMH lights but is now available from a single LED fixture.

USE WITH SMART TOUCHSCREEN CONTROLLER

The PRO GROW EVO LED 780 W Model Z is compatible with the PRO GROW Smart Touchscreen Controller. Equipped with an RJ14 Cable, up to 160 fixtures can be daisy chained from the one controller. Simply switch all fixtures to EXT mode to begin controlled operation.

SMART TOUCHSCREEN CONTROLLER COMPATIBLE

(sold separately)

FOLDABLE DESIGN

Simply unfold, plug and play with the PRO GROW EVO 780 W Model Z. Four quality rope ratchets are included for immediate installation.

SPECTRUM TEST REPORT - 4 Channels

Channel 1- Grow Stage

Channel 2- Early Bloom

Channel 3- Late Bloom

Channel 4- UVA & UVB

For a full light source test report scan the QR code or visit our web site @ www.progrow.net.au

MANUAL CHANNEL OPERATION

Control Channels Via The Fixture:

Blue/red exchange button.
Swap from channel 1 to channel 2 & 3

UVA/UVB button.
Engage for channel 3

Manual dimming switch.
Switch to EXT when using the Z - Smart Controller

CAUTION: UV light is barely visible. Always wear UV 400 eye protection when UVA/UVB (channel 3) is in operation.

PAR DISTRIBUTION (with red, Far-red & UV)

Mounting Height: 12 (30CM)

SPECIFICATIONS

Model:	780 W Model E 8 Bar
Light Source:	2510 x Single Mount Diode/LED's
Input Voltage:	120 V-277 V AC
Frequency Range:	50~60 Hz
Power/Watts:	780 W
Net Weight:	13.7 kg
Light Beam Angle:	120 Degree
Body Case Material:	Die Cast/Pressed Aluminum
IP Grade:	IP55 (water resistant)
Size:	L-1105 mm x W-1067 mm x H-54 mm
Lifespan:	>50,000 Hours
Min Operating Temp:	-25°C
Max Operating Temp:	40°C
Warranty:	3 Year Warranty
